

PURMO Compact

The Compact is one of the most energy efficient designs on the market. It only requires a small amount of water to function; it heats up very quickly and is easy to control. The large convector plate within the design means that heat is expelled across a greater surface area, distributing heat more effectively around the room. With straight lines and quality finishing, the Compact is a sleek asset to both traditional and contemporary interiors. The radiator is hardwearing because of its smooth and solid scratch resistant coating, and easy to clean.

Information

Structure:	EN442.1 and 2
Material:	Cold rolled steel
Surface process:	The radiator is alkalic degreased, phosphated, dipped in primer (electrical), coated in polyester-epoxy resin powder, stoved (about 200°C). The surface process follows the standard DIN 55900.
Colour:	White, RAL 9016
Working pressure:	10 bar
Quality standard:	SFS-EN ISO 9002
Heights (mm):	300, 450, 600, 700
Lengths (mm):	400, 500, 600, 700, 800, 900, 1000, 1100, 1200, 1400, 1600, 1800, 2000, 2300, 2600, 3000
Water temperature:	0°C - 120°C
pH value:	between 7 - 9
Systems:	To be used on two pipe, indirect or closed circuit heating systems complying with BS 5449: 1990. On completion, the system should be cleaned out in accordance with BS 7593: 1992 and BS 5449: 1990.
Guarantee:	Five years

Guarantee

Each PURMO COMPACT is guaranteed for ten years from the date of installation against defects caused by faulty materials or manufacture. We replace the defective product with a similar or technically corresponding convector.

The guarantee does not cover damages that are due to faulty storage and handling at delivery or installation, nor damages that are due to faulty use of the convector, such as inside and outside rust, use of corrosive substances, too high pressure or damage due to freezing.

This guarantee does not cover incidental damages caused by the Purmo product, costs for change of product, production loss of the customer, loss of profit or other indirect costs.

In case of a guarantee claim the buyer must contact the seller and present some kind of evidence of purchase of the product, for example, order confirmation or delivery note.

The defective product always has to be sent back to Purmo for inspection within one month from the date of complaint, if not otherwise agreed upon.
